Reasons for Allowance

Claims 1, 3-8, and 10-24 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance:

Independent claims 1, 15, 19, and 20, contain limitations not taught by the prior art of record. As stated in the Examiner's Interview Summary filed 10/6/2004, the prior art of record does not specifically teach the storing of at least a portion of a security program in the microcontroller of a secure flash memory device (claim 8 and claim 10). Applicant responded with an amendment adding allowable subject matter into the independent claims not taught by the prior art of record. Specifically, the prior art of record does not teach pre-installing a portion of a security program nor a predetermined code into the microcontroller, itself, of a flash memory device.

Patterson et al. teaches transferring of a Download and Execute routine for data protection during manufacture of a flash device. However, Patterson does not teach installing a portion of the routine into the microcontroller, itself. As taught in the abstract of Patterson, the routine is stored in the read-only memory of the device.

Claims 3-8, 10-14, 16-18, and 21-24 are allowable over the prior art of record as being dependent on allowable base claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
